

# The Welcome Home Project: Community Education Presentation on Homelessness

As part of the Welcome Home Project, the Toronto Shelter Network, with the support of the Trillium Foundation, is launching a one-year project to develop and deliver a virtual 20-minute community education presentation to Toronto community groups to improve understanding and awareness of the issue of homelessness.

## The Virtual Presentation Will:

Engage with and be delivered to resident associations, business improvement areas, school groups and church groups and others

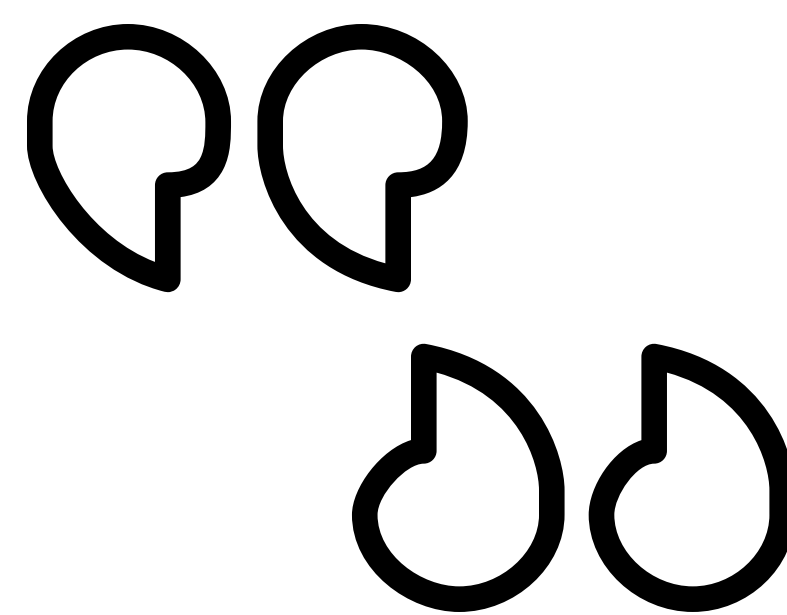

Provide an overview of the state, causes, myths and misconceptions about homelessness and actions community members can take to help end homelessness

Provide an opportunity to hear from someone with lived experience of homelessness

"The Welcome Home Project presentation on the causes and challenges of homelessness was excellent, and a great addition to our bi-monthly Zoom meeting. This was very enlightening for our members and raised a great deal of interest and support."

- Angelo Bertolas, Co-Chair, York Quay Neighbourhood Association

**Interested in us delivering a presentation to  
your community group?**
